Allowance of Application # 09/813,667

1. The following communication is in response to applicant's amendment received 12-December-2005. Claim 5 has been cancelled by this amendment.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the invention described in USP No. 5,668,995 to Bhat, the improvement comprising a method for using a Thin Client Sizing Tool which utilizes a series of window screens to accumulate information to develop a customer profile and certain factors that can be processed by internal algorithms to generate an optimal set of design arrangements for a proposed configuration of servers (Server Farm) and associated support apparatus established at one or more sites, wherein the proposed configuration is the most appropriate configuration for a particular customer's enterprise. This patentable distinction is included in each of the independent claims, nos. 1, 4, and 6. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <Thin Client Sizing Tool for generating a Server Farm configuration solution> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 12, line 1 through page 54, line 15, and Figures 1A-28. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
